Eksemplet er fra **Outlook**. Andre mailprogrammer kan have andet layout i opsætningsmenuen, men valg og værdier er grundlæggende de samme. Bemærk specielt, at der skal sættes flueben ved ***This server requires an encrypted connection (SSL)*** samt portnumre (995 og 465), da disse er forskellige fra dem der står i YouSee's egen anvisning.

Man kan også downloade YouSee's program **Mailsupport** (yousee.dk → **Bredbånd** → **Hjælp til bredbånd** → **Hjælp til mail** → **Opsæt din mail via Mailsupport**). Dette program vil foretage de nødvendige indstillinger automatisk.
